1. [Did you like the book?] : It was good to me.

[] Great

☒ Good

[] Bad

[] Boring

2. [Would you recommend this book to your classmates?] :

Yes, I would like both my classmates and my older sister to read this book.

3. [Why or why not?] :

First of all, this book reminded me of truthful love with my current lover. Also, I was rather sympathetic to Stephany as a person that have experienced either good or sad love in spite of minding her behaviors toward Carlo, because anyone who has experienced either good or sad love has either good and sore memories about love.

Thus, I individually think that if you have experiences about either good or sad love and meet your previous lover by chance, you may take the similar behaviors like Stephany because of previous fascinating memories that you experienced with your previous lover although there are realistic problems. Frankly speaking, I may take the similar behaviors like Stephany because of previous fascinating memories that you experienced with your previous lover although there are realistic problems.

However, as Carlo accept his current life although he has been loving Stephany in his mind, I felt that I have to treat my current lover preciously and take an action well with mutual respect after thinking of my wrong and selfish experiences about previous love and reflecting myself. For these reasons, I recommended this book to them. (210w total - answers)
